

# Advanced Technologies Delivering **Performance and Savings**

## **Rebel<sup>®</sup>** Cooling & Heat Pump **3-28 tons**

Rebel packaged rooftop systems provide building owners with energy savings up to 43% above ASHRAE's 90.1 2019 standard, enabling for complete system payback in under two years. Combining quality manufactured equipment with advanced HVAC technologies, Rebel delivers superior rooftop part-load ratings of up to 20.6 IEER.

### **INVERTER SCROLL COMPRESSOR**

At the core of Rebel's advanced technologies is the inverter scroll compressor that dynamically responds to match the load of a building, giving you superior energy efficiencies, precise temperature/humidity control and cost savings unmatched by conventional HVAC compressors.

### **ENERGY RECOVERY**

Lower the total cost of rooftop HVAC ownership with Rebel's energy recovery options, featuring a rotating energy recovery wheel or CORE heat exchanger that capture heat and humidity energy — a 40% increase to system efficiency.
