

# **CHAPTER TABLE OF CONTENTS**

Preface		
Chapter	I	– Introduction to HVAC Systems
Chapter	II	– Properties of Moist Air
Chapter	III	– HVAC System Basics
Chapter	IV	– Unitary HVAC Systems
Chapter	V	– Central Heating Equipment
Chapter	VI	– Central Cooling Equipment
Chapter	VII	– Hydronic Distribution Systems
Chapter	VIII	– Air Distribution Systems
Chapter	IX	– Central HVAC Systems
Chapter	X	– HVAC System Control
Appendix	A	– HVAC Glossary
Appendix	B	– HVAC MasterFormat™ Specification Outline
Appendix	C	– SMACNA HVAC References & Resources
Appendix	D	– Photos of Various Equipment and Components
Index		

# DETAILED TABLE OF CONTENTS

## **PREFACE**

### **CHAPTER I – INTRODUCTION TO HVAC SYSTEMS**

- 1.1 Introduction
- 1.2 HVAC System Purpose
- 1.3 HVAC Contractor Defined
- 1.4 Purpose Of This Manual
- 1.5 Overview Of This Manual

### **CHAPTER II – PROPERTIES OF MOIST AIR**

- 2.1 Introduction
- 2.2 Air Chemistry
  - 2.2.1 Air Ingredients
  - 2.2.2 Standard Dry Air
  - 2.2.3 Water Vapor
  - 2.3.4 Other Constituents
- 2.3 Air Temperature
  - 2.3.1 What Is Temperature?
  - 2.3.2 Temperature Scales
  - 2.3.3 Temperature Scale Relationships
  - 2.3.4 Operative Temperature
- 2.4 Air Humidity
- 2.5 Moist Air Physical Properties
  - 2.5.1 Key Moist Air Physical Properties For HVAC
  - 2.5.2 Dry-Bulb Temperature
  - 2.5.3 Wet-Bulb Temperature
  - 2.5.4 Dew-Point Temperature
  - 2.5.5 Percent Relative Humidity
  - 2.5.6 Humidity Ratio
- 2.6 Psychrometric Chart
  - 2.6.1 What Is Psychrometry?
  - 2.6.2 Psychrometric Chart
- 2.7 Heat Transfer Methods
  - 2.7.1 Heat Transfer Direction
  - 2.7.2 Three Methods Of Heat Transfer
  - 2.7.3 Conduction
  - 2.7.4 Convection
  - 2.7.5 Radiation
  - 2.7.6 HVAC Is All About Heat Transfer

- 2.8 Heat Transfer Units
  - 2.8.1 British Thermal Unit (Btu)
  - 2.8.2 Btu Per Hour
  - 2.8.3 Conversion To Electrical Units
- 2.9 Moist Air Energy Content
  - 2.9.1 Change Of State
  - 2.9.2 Sensible Heat
  - 2.9.3 Latent Heat
  - 2.9.4 Relationship Between Sensible & Latent Heat
  - 2.9.5 Total Heat
  - 2.9.5 Change Of State Terminology
- 2.10 Air Conditioning Ton
- 2.11 Simple Space Conditioning Processes

### **CHAPTER III – HVAC SYSTEM BASICS**

- 3.1 Introduction
- 3.2 HVAC System Purpose
- 3.3 HVAC Zones & Spaces
  - 3.3.1 Zone
  - 3.3.2 Space
- 3.4 Airflow Defined
- 3.5 Four Variables That Impact Human Thermal Comfort
- 3.6 Defining Human Comfort
  - 3.6.1 ASHRAE Standard 55
  - 3.6.2 ASHRAE Summer & Winter Comfort Zones
- 3.7 Indoor Air Quality
  - 3.7.1 Importance Of Indoor Air Quality
  - 3.7.2 ASHRAE Standard 62.1
- 3.8 HVAC System Energy Use
  - 3.8.1 HVAC System Energy Use
  - 3.8.2 ASHRAE/IESNA Standard 90.1
  - 3.8.3 International Energy Conservation Code
  - 3.8.4 Other Energy Codes & Standards
- 3.9 HVAC System Operation
- 3.10 Basic HVAC System Mechanical Elements
  - 3.10.1 Basic HVAC System Mechanical Elements
  - 3.10.2 Air Cleaner
  - 3.10.3 Thermal Conditioner
  - 3.10.4 Air Mover
  - 3.10.5 Air Distribution System
- 3.11 HVAC Controls

- 3.12 Space Conditioning Methods Used By HVAC Systems
  - 3.12.1 Space Conditioning Methods
  - 3.12.2 Constant Air Volume-Variable Air Temperature
  - 3.12.3 Variable Air Volume-Constant Air Temperature
  - 3.12.4 Variable Air Volume-Variable Air Temperature
- 3.13 HVAC Systems Categorized By Primary Heat Transfer Media
  - 3.13.1 HVAC System Categorized By Primary Heat Transfer Media
  - 3.13.2 All-Air HVAC Systems
  - 3.13.3 Air-Hydronic HVAC Systems
  - 3.13.4 All-Hydronic HVAC Systems
  - 3.13.5 Direct Refrigerant HVAC Systems
  - 3.13.6 Hybrid HVAC Systems
- 3.14 HVAC System Space Conditioning Methods & Categories
- 3.15 HVAC System Equipment Location & Heat Transport

## **CHAPTER IV – UNITARY HVAC SYSTEMS**

- 4.1 Introduction
- 4.2 Unitary HVAC System Characteristics & Use
- 4.3 Unitary HVAC System Operation
  - 4.3.1 Unitary HVAC System Operation
  - 4.3.2 Mechanical Refrigeration Cycle
  - 4.3.3 Direct Expansion Unitary HVAC Systems
- 4.4 Unitary HVAC System Components
  - 4.4.1 Eight Unitary HVAC System Functional Components
  - 4.4.2 Compressor
  - 4.4.3 Condenser Or Condensing Coil
  - 4.4.4 Expansion Valve Or Regulator Valve
  - 4.4.5 Evaporator Or Cooling Coil
  - 4.4.6 Fan
  - 4.4.7 Refrigerant
  - 4.4.8 Refrigerant Piping
  - 4.4.9 Controls
  - 4.4.10 Other Components
- 4.5 Unitary HVAC System Categories
- 4.6 Conventional Unitary HVAC Systems
  - 4.6.1 Conventional Unitary HVAC Systems
  - 4.6.2 Single-Packaged Units
  - 4.6.3 Split Systems
  - 4.6.4 Packaged Terminal Air Conditioners
- 4.7 Unitary Heat Pumps
  - 4.7.1 Unitary Heat Pump Types
  - 4.7.2 Air-To-Air Unitary Heat Pumps
  - 4.7.3 Water-To-Air Unitary Heat Pumps
  - 4.7.4 Multiple Split-System Heat Pumps

4.8 Combination Unitary & Central HVAC Systems

**CHAPTER V – CENTRAL HEATING EQUIPMENT**

- 5.1 Introduction
- 5.2 Furnaces
- 5.3 Boilers
- 5.4 Boiler Sizing
- 5.5 Boiler Construction
  - 5.5.1 Boiler Construction
  - 5.5.2 Fire-Tube Boilers
  - 5.5.3 Water Tube Boilers
- 5.6 Electric Boilers
- 5.7 Condensing Boilers
- 5.8 Boiler Auxiliary Equipment
  - 5.8.1 Boiler Circulating Pumps
  - 5.8.2 Deaerators
- 5.9 Boiler Controls
  - 5.9.1 Boiler Control Methods
  - 5.9.2 Boiler Burner Control

**CHAPTER VI – CENTRAL COOLING EQUIPMENT**

- 6.1 Introduction
- 6.2 Central Cooling Plant Operation & Components
- 6.3 Chiller Purpose
- 6.4 Refrigeration Cycle
  - 6.4.1 Chiller Refrigeration Cycle
  - 6.4.2 Compressor
  - 6.4.3 Condenser
  - 6.4.4 Expansion Valve
  - 6.4.5 Evaporator
- 6.5 Refrigerant
- 6.6 Motor-Compressor Units
  - 6.6.1 Motor-Compressor Unit Types
  - 6.6.2 External Drive Motor-Compressor Units
  - 6.6.3 Hermetically Sealed Motor-Compressor Units
- 6.7 Mechanical Compressor Operation & Characteristics
  - 6.7.1 Compressor Types
  - 6.7.2 Centrifugal Compressors & Chillers
  - 6.7.3 Reciprocating Compressors & Chillers
  - 6.7.4 Rotary Screw Compressors & Chillers
  - 6.7.5 Scroll Compressors & Chillers
- 6.8 Absorption Chillers
  - 6.8.1 Absorption Chillers In The United States

- 6.8.2 When To Consider An Absorption Chiller
- 6.8.3 Absorption Chiller Operation
- 6.8.4 Direct- Versus Indirect-Fired Absorption Chillers
- 6.8.5 Multiple-Effect Absorption Chillers
- 6.8.6 Absorption Chiller Operating Characteristics
- 6.9 Cooling Towers
  - 6.9.1 Cooling Tower Operation
  - 6.9.2 Cooling Towers Types
  - 6.9.3 Cooling Tower Control

## **CHAPTER VII – HYDRONIC DISTRIBUTION SYSTEMS**

- 7.1 Introduction
- 7.2 Hot Water Distribution System Operation
- 7.3 Chilled Water Distribution System Operation
- 7.4 Hydronic Distribution System Operating Temperature
  - 7.4.1 Operating Temperature Classifications
  - 7.4.2 Low Temperature Water System
  - 7.4.3 Medium Temperature Water System
  - 7.4.4 High Temperature Water System
  - 7.4.5 Chilled Water System
  - 7.4.6 Dual Temperature Water System
- 7.5 Hydronic Distribution System Arrangements
  - 7.5.1 Hydronic Distribution System Arrangements
  - 7.5.2 One-Pipe Hydronic Distribution System
  - 7.5.3 Two-Pipe Hydronic Distribution System
  - 7.5.4 Three-Pipe Hydronic Distribution System
  - 7.5.5 Four-Pipe Hydronic Distribution System
  - 7.5.6 Summer-Winter Hydronic Distribution System
- 7.6 Multi-Loop Hydronic Distribution System
- 7.7 Hydronic System Heat Transfer Mode
  - 7.7.1 Convection Defined
  - 7.7.2 Natural Convection
  - 7.7.3 Forced Convection
- 7.8 Convection Terminal Units
  - 7.8.1 Convection Terminal Units
  - 7.8.2 Air-Coil Units
  - 7.8.3 Fan-Coil Units
  - 7.8.4 Induction Units
  - 7.8.5 Unit Ventilators
  - 7.8.6 Radiators
  - 7.8.7 Finned-Tube Radiation Heaters
  - 7.8.8 Valence Units
  - 7.8.9 Convectors
  - 7.8.10 Unit Heaters

7.9 Hydronic Radiant Heat

**CHAPTER VIII – AIR DISTRIBUTION SYSTEMS**

- 8.1 Introduction
- 8.2 Air Distribution System Purpose
- 8.3 Air Distribution System Components
- 8.4 Fans
  - 8.4.1 Fan Purpose
  - 8.4.2 Fan Categories
  - 8.4.3 Axial Fans
  - 8.4.4 Centrifugal Fans
  - 8.4.5 Fan Operation
  - 8.4.6 Varying Fan Speed
  - 8.4.7 Fan Laws
- 8.5 Air Handling Units
- 8.6 Air Ducts & Plenums
  - 8.6.1 Air Duct Purpose
  - 8.6.2 Air Duct Construction
  - 8.6.3 Air Duct Accessories
  - 8.6.4 Additional Information On Air Ducts
  - 8.6.5 Plenums
- 8.7 VAV Terminal Units
  - 8.7.1 VAV Terminal Unit Purpose
  - 8.7.2 VAV Terminal Unit Operation
  - 8.7.3 VAV Terminal Unit Inlet Pressure
- 8.8 Air Outlets & Inlets
  - 8.8.1 Air Outlet & Inlet Function
  - 8.8.2 Air Outlet & Inlet Types
  - 8.8.3 Air Outlet & Inlet Selection & Installation
- 8.9 Air Distribution System Operation
- 8.10 Air Distribution System Operating Point
- 8.11 Air Distribution System Dynamics
- 8.12 System Operating Point & Fan Speed
- 8.13 Variable Frequency Drives
  - 8.13.1 What Is A Variable Frequency Drive?
  - 8.13.2 VFD Operation
  - 8.13.3 Impact Of Fan Speed Control
- 8.14 Air Cleaning Devices
  - 8.14.1 Need For Air Cleaning Devices
  - 8.14.2 Categories Of Air Pollutants
  - 8.14.3 Particulate Air Filtration
  - 8.14.4 Gas-Phase Air Filtration
  - 8.14.5 Pollutant Destruction

## **CHAPTER IX – CENTRAL HVAC SYSTEMS**

- 9.1 Introduction
- 9.2 Central HVAC System Subsystems
  - 9.2.1 Five Primary Central HVAC Subsystems
  - 9.2.2 Central Heating Subsystem
  - 9.2.3 Central Cooling Subsystem
  - 9.2.4 Hydronic Distribution Subsystem
  - 9.2.5 Air Distribution Subsystem
  - 9.2.6 Control Subsystem
- 9.3 VAV System Description
- 9.4 VAV System Operation
  - 9.4.1 Simple Single-Zone VAV System
  - 9.4.2 Adjusting Airflow
  - 9.4.3 Controlling Airflow
- 9.5 VAV Terminal Unit Operation
- 9.6 HVAC Systems Incorporation VAV
  - 9.6.1 Types Of HVAC Systems Incorporating VAV
  - 9.6.2 Cooling-Only VAV Systems
  - 9.6.3 VAV Reheat Systems
  - 9.6.4 Dual-Duct VAV Systems
  - 9.6.5 Separate Interior & Exterior Systems
- 9.7 Constant Volume HVAC Systems
- 9.8 VAV Versus Constant-Volume HVAC Systems
  - 9.8.1 VAV HVAC System Advantages
  - 9.8.2 Constant-Volume HVAC System Advantages

## **CHAPTER X – HVAC SYSTEM CONTROL**

- 10.1 Introduction
- 10.2 Control System Purpose
- 10.3 Control System Operation
  - 10.3.1 Control System Elements
  - 10.3.2 Controlled Processes
  - 10.3.3 Controlled Variable
  - 10.3.4 Setpoint
  - 10.3.5 Sensor
  - 10.3.6 Controller
  - 10.3.7 Controlled Device
  - 10.3.8 Controlled Agent
- 10.4 Control Loops
  - 10.4.1 Control Loop Defined
  - 10.4.2 Types Of Control Loops
  - 10.4.3 Closed Loop Control Systems
  - 10.4.4 Open Loop Control Systems
  - 10.4.5 Closed Loop HVAC Control System Example

- 10.5 Thermostat: Simple Control System
- 10.6 Types Of Control Systems
  - 10.6.1 Control System Types
  - 10.6.2 Pneumatic Control
  - 10.6.3 Analog Electric Or Electronic Control
  - 10.6.4 Direct Digital Control
- 10.7 Building Automation & Control Systems
- 10.8 Open-Architecture Control Systems
  - 10.8.1 What Is An Open-Architecture Control System?
  - 10.8.2 Advantages Of Open-Architecture Control Systems
  - 10.8.3 Open-Architecture Control Standards

**APPENDIX A – HVAC GLOSSARY**

**APPENDIX B – HVAC MASTERFORMAT™ SPECIFICATION OUTLINE**

**APPENDIX C – SMACNA HVAC REFERENCES & RESOURCES**

**APPENDIX D – PHOTOS OF VARIOUS EQUIPMENT AND COMPONENTS**

**INDEX**

**HVAC SYSTEMS: UNDERSTANDING THE BASICS**  
**LIST OF FIGURES**

<b>Title of Figure</b>	<b>Figure #</b>	<b>Chapter #</b>	<b>Page #</b>
Manual Chapter Flow Chart	1-1	I	I-3
Typical HVAC Psychrometric Chart	2-1	II	II-7
Psychrometric Chart Example	2-2	II	II-8
Relationship Between Sensible & Latent Heating for Water	2-3	II	II-15
Simple Space Conditioning Processes (on Psychrometric Chart)	2-4	II	II-17
Commercial Office Building Floor Plan	3-1	III	III-2
ASHRAE Summer & Winter Comfort Zones	3-2	III	III-5
ASHRAE Summer & Winter Comfort Zones (on Psychrometric Chart)	3-3	III	III-6
Commercial & Institutional Building Energy Use	3-4	III	III-9
Basic HVAC System Elements	3-5	III	III-11
All-Air HVAC System	3-6	III	III-17
Air-Hydronic HVAC System	3-7	III	III-19
All-Hydronic HVAC System	3-8	III	III-21
Refrigeration Cycle	4-1	IV	IV-2
Split-System Unitary HVAC System	4-2	IV	IV-8
Central Cooling Plant Schematic Diagram	6-1	VI	VI-2
Vapor-Compression Refrigeration Cycle	6-2	VI	VI-4
Simple Hot Water Distribution System	7-1	VII	VII-2
Simple Chilled Water Distribution System	7-2	VII	VII-3
