

# TABLE OF CONTENTS

## **1.0 WHAT IS GREEN CONSTRUCTION AND HOW DOES IT AFFECT ME?**

- 1.1 What is a green building?
- 1.2 What's In A Name?
- 1.3 Aren't green buildings just about design?
- 1.4 What do HVAC systems have to do with green buildings?
- 1.5 Is green construction a new market or a passing fad?

## **2.0 CAN MY FIRM BE GREEN WITHOUT HAVING A GREEN PROJECT?**

- 2.1 Can my firm be proactive about the environment?
- 2.2 Are there advantages to being green?
- 2.3 Should building commissioning be part of my quality assurance program?
- 2.4 Is green the same as lean?

## **3.0 WHAT GREEN BUILDING REQUIREMENTS WILL AFFECT MY BUSINESS?**

- 3.1 What are green building rating systems and why do they exist?
- 3.2 What green rating system will I most likely encounter?
- 3.3 How does LEED™ certification work?
- 3.4 Where can I get copies of the LEED™ green building rating system?
- 3.5 What are some common green requirements that I need to be aware of?
- 3.6 How will green requirements affect my cost of doing business?
- 3.7 Are green building rating systems a passing fad?

## **4.0 DO MY EMPLOYEES NEED ANY SPECIAL TRAINING OR CERTIFICATIONS TO WORK ON A GREEN PROJECT?**

- 4.1 Why would my employees need any special training for green projects? Aren't we just going to install in accordance with plans and specifications?
- 4.2 Will trained office and field personnel give me a competitive advantage on green building projects?
- 4.3 What training should my project managers and estimators have?
- 4.4 What is a LEED Accredited Professional (LEED AP) and why is this designation important?
- 4.5 What training should my field personnel have and how should I provide it?
- 4.6 Where can I find green education and training opportunities for my employees?

## **5.0 HOW DOES BIDDING DIFFER ON A GREEN BUILDING PROJECT?**

- 5.1 Where are the green requirements?
- 5.2 If the green building requirements are not explicitly included in the HVAC contractor's scope of work, then where are they?
- 5.3 Are there other implicit green project requirements that I should watch for?
- 5.4 What should I do if green requirements are vague in the bid documents?
- 5.5 Will I need more time for product research on a green building project?
- 5.6 Aren't most of the additional costs on a green building project really project overhead?

## **6.0 CAN A GREEN BUILDING PROJECT BE DESIGN BUILD?**

- 6.1 Does design build work for a green building project?
- 6.2 How does the design process differ on a green building project?
- 6.3 How will green design impact project costs and schedule?

## **7.0 WHAT SHOULD I LOOK FOR IN A GREEN CONTRACT?**

- 7.1 Are there model green contracts?
- 7.2 What green criteria do I need to be aware of?
- 7.3 What green contractual requirements do I need to be aware of?
- 7.4 Is a clearly defined scope of work more important on a green project?

## **8.0 ARE THERE SPECIAL PRODUCTS THAT I NEED TO USE ON A GREEN BUILDING PROJECT?**

- 8.1 What are some typical material and equipment requirements on a green building project?
- 8.2 What about expendables like duct sealant, coatings, adhesives, cleaning fluids, and other similar materials?

## **9.0 DO GREEN REQUIREMENTS IMPACT MY FABRICATION SHOP OPERATIONS?**

- 9.1 Will green requirements impact my shop fabrication schedule?
- 9.2 Do we need to get our materials somewhere special?

## **10.0 WILL GREEN REQUIREMENTS AFFECT FIELD PRODUCTIVITY?**

- 10.1 Are there sequencing and scheduling issues on green building projects that I should be aware of?
- 10.2 What about material deliveries and on-site storage requirements?
- 10.3 What about indoor air quality (IAQ) during green building construction?
- 10.4 In addition to the usual concerns and costs associated with the early startup of the HVAC system, are there other issues that need to be considered on a green building?
- 10.5 How will waste stream management affect my field productivity and what am I responsible for?

## **11.0 ARE THERE SPECIAL COMMISSIONING AND CLOSEOUT REQUIREMENTS ON A GREEN PROJECT?**

- 11.1 How does system commissioning differ on a green building project?
- 11.2 Is testing, adjusting, and balancing (TAB) an important part of HVAC commissioning on a green building project?
- 11.3 Why is it important to have a commissioning plan?
- 11.4 What if I am required to develop the commissioning plan?
- 11.5 Why does the project need an outside commissioning authority?
- 11.6 Are closeout activities different on a green building?

## **12.0 HOW DO I MARKET MY FIRM'S GREEN BUILDING EXPERIENCE AND EXPERTISE?**

- 12.1 How do I find out who is building green buildings in my market area?
- 12.2 Could my firm be the outside commissioning authority?
- 12.3 Is there a market for green service work?
