

New Technology Sessions

The New Technology Sessions at SMACNA's 67th Annual Convention will provide the newest information on state-of-the-art technology, products and services for SMACNA members.

Conducted by Product Show exhibitors, the eight sessions take place Tuesday, Oct. 12. Two sessions immediately follow the morning Product Show and six more are scheduled in the afternoon. Watch your convention brochures for the complete schedule and times.

New Technology Sessions include:

- "Green Ductwork Done Right" – Trane
- "Meeting Your Customers' Needs for High Performance HVAC Systems" – McQuay International
- "Wireless Individual Airflow Control" – DuroDyne
- "Computerized Spiral Pipe Cutting" – Plasma Automation Inc.
- "Using SQL Technology to Improve Your Service and Specialty Business" – Sage Software Inc.
- "Building Code Effect on Application and Selection of Air Control Devices" – Ruskin Air and Sound Control
- "Design/Build Estimating" – FastEST Inc.
- "3D Laser Scanning and Applications" – Quickpen, A Trimble Company
