TABLE OF CONTENTS		vii
CHAPTER 1	INTRODUCTION	Page
1.1	OVERVIEW	1.1
1.2	WHAT ARE SEISMIC LOADS?	1.1
1.3	WHAT HAPPENS DURING AN EARTHQUAKE?	1.1
1.4	HOW TO RESIST SEISMIC LOADS	1.1
1.5	KINDS OF BRACING	1.1
1.6	WHY DIFFERING REQUIREMENTS?	1.1
CHAPTER 2	INSTRUCTIONS FOR USING THE GUIDELINES	
2.1	SCOPE	2.1
2.2	USE OF THE GUIDELINES	2.1
2.3	RESPONSIBILITIES OF THE DESIGN PROFESSIONAL	2.1
2.4	THE SEISMIC HAZARD LEVEL (SHL)	2.1
2.5	DETERMINING CONNECTION LEVELS TO THE SUPPORTING STRUCTURE	2.2
2.6	HOW TO READ THE SIZING TABLES	2.2
2.7	USING THE SIZING TABLES	2.2
2.8	EXAMPLE: DETERMINING THE SHL	2.4
2.9	EXAMPLE: DUCT BRACING	2.4
CHAPTER 3	GENERAL REQUIREMENTS	
3.1	GENERAL REQUIREMENTS	3.1
3.2	MATERIAL SPECIFICATIONS	3.2
3.3	GENERAL REQUIREMENTS FOR BRACING OF DUCTS	3.4
3.4	GENERAL REQUIREMENTS FOR BRACING OF PIPES	3.5
3.5	NOTES ON ATTACHMENT TO THE BUILDING STRUCTURE	3.6
CHAPTER 4	DETAIL DRAWINGS OF BRACING	
4.1	OVERVIEW	4.1
4.2	INSTRUCTIONS FOR BRACING INDIVIDUALLY SUPPORTED PIPE	4.1
CHAPTER 5	TABLES FOR SEISMIC HAZARD LEVEL AA (g = 1.0)	
5.1	USE OF TABLES	5.1
CHAPTER 6	TABLES FOR SEISMIC HAZARD LEVEL A (g = 0.67)	
6.1	USE OF TABLES	6.1
CHAPTER 7	CHAPTER INTENTIONALLY OMITTED	7.1
CHAPTER 8	DETAILS OF CONNECTIONS TO STRUCTURAL MEMBERS	
8.1	INTRODUCTION	8.1
CHAPTER 9	MISCELLANEOUS CONNECTIONS	
9.1	INTRODUCTION	9.1

APPENDIX A SAMPLE SPECIFICATIONS A.1
APPENDIX B REFERENCES B.1
APPENDIX C GLOSSARY C.1
APPENDIX D APPROVALS D.1
INDEX I.1

TABLES**Page**

3-1	Standard Sheet Metal Gages	3.2
3-2	Minimum Allowable Cable Strength	3.3
3-3	Minimum Allowable Design Values for Expansion Anchors	3.3
5-1	Side Bracing for Rectangular Ducts, (SHL AA – g=1.00), L=2' 8" (Max.)	5.2
5-2	Side Bracing for Rectangular Ducts with Rod Hangers, (SHL AA – g=1.0)	5.3
5-3	Center Bracing for Rectangular Ducts, (SHL AA – g=1.0), L=7 ft	5.4
5-4	Center Bracing for Rectangular Ducts, (SHL AA – g=1.0), L=10 ft	5.5
5-5	Floor Supported Ducts, (SHL AA – g=1.0)	5.6
5-6	Bracing for Round Ducts, (SHL AA – g=1.0)	5.7
5-7	Schedule for Bracing Pipes and Conduit, (SHL AA – g=1.0)	5.8
5-8	Schedule for Bracing Pipes on Trapeze, (SHL AA – g=1.0)	5.9
5-9	Floor Supported Pipes, (SHL AA – g=1.0)	5.10
5-10	Duct Risers, SHL AA	5.11
5-11	Pipe Risers, SHL AA	5.12
6-1	Side Bracing for Rectangular Ducts, (SHL A – g=0.67), L=2' 8" (Max.)	6.2
6-2	Side Bracing for Rectangular Ducts with Rod Hangers, (SHL A – g=0.67)	6.3
6-3	Center Bracing for Rectangular Ducts, (SHL A – g=0.67), L=7 ft	6.4
6-4	Center Bracing for Rectangular Ducts, (SHL A – g=0.67), L=10 ft	6.5
6-5	Floor Supported Ducts, (SHL A – g=0.67)	6.6
6-6	Bracing for Round Ducts, (SHL A – g=0.67)	6.7
6-7	Schedule for Bracing Pipes and Conduit, (SHL A – g=0.67)	6.8
6-8	Schedule for Bracing Pipes on Trapeze, (SHL A – g=0.67)	6.9
6-9	Floor Supported Pipes, (SHL A – g=0.67)	6.10
6-10	Duct Risers, SHL A	6.11
6-11	Pipe Risers, SHL A	6.12
8-1	Schedule for Typical Connections to Structural Supporting Members ¹	8.2

FIGURES

Page

2-1	Summary of Steps for Using Tables	2.2
4-1	Typical Locations of Bracing	4.5
4-2	Side Bracing for Rectangular Ducts	4.6
4-3	Side Bracing for Rectangular Ducts	4.7
4-4	Cable Side Bracing for Rectangular Ducts	4.8
4-5	Side Bracing for Rectangular Ducts	4.9
4-6	Center Bracing for Rectangular Ducts	4.10
4-7	Cable Center Bracing for Rectangular Ducts	4.11
4-8	Floor Supported Duct	4.12
4-9	Single Hanger Bracing for Round Ducts 33–36 inches (838–900 MM)	4.13
4-10	Single Hanger Cable Bracing for Round Ducts 33–36 inches (838–900 MM) ...	4.14
4-11	Double Hanger Bracing for Round Ducts up to 84 inches (2100 MM)	4.15
4-12	Double Hanger Bracing for Round Ducts up to 84 inches (2100 MM)	4.16
4-13	Duct Risers	4.17
*4-14	Transverse Bracing for Pipes	4.18
*4-15	Strut Bracing for Pipes	4.19
*4-16	Alternate Attachment to Hangers for Pipe Bracing	4.20
*4-17	Alternate Bracing for Pipes	4.21
*4-18	Cable Bracing for Pipes	4.22
*4-19	Strut Bracing for Pipe Trapeze	4.23
*4-20	Cable Bracing for Pipe Trapeze	4.24
*4-21	Floor Supported Risers	4.25
*4-22	Pipe Risers	4.26
8-1	Connections to Concrete	8.3
8-1	Connections to Concrete (continued)	8.4
8-2	Alternate Connections to Concrete	8.5
8-3	Connections to Steel	8.6
8-4	Alternate Connection to Open Web Steel Joints	8.7
8-5	Connections to Steel	8.8
8-6	Ducts Hung Below Steel Beams	8.9
8-7	Hanger Connection to Wood	8.10
8-8	Connections to Wood I-Joist	8.11
8-9	Connections to Wood	8.12
9-1	Cable Connection to Duct Frame	9.2
9-2	Alternate Cable Connection to Duct Frame	9.3
9-3	Longitudinal Cable Connection to Duct Hanger	9.4
9-4	Cable End Connection	9.5
9-5	Pipe Strut Connections	9.6
9-6	Connections for Framing Channel	9.7
9-7	Hubless Cast Iron Pipe	9.8
9-8	Framing Channel	9.9
9-9	Connections for Pipes on Trapeze	9.10
9-10	Alternate Stiffener Connection	9.11
9-11	Seismic Joints in Pipes	9.12
9-12	Welded Tabs	9.13
