

Why SMACNA TAB Contractors Are the Best Partners for Your Projects

SMACNA Testing and Balancing Contractors leverage top-tier training and certification programs to deliver safe, healthy building environments. SMACNA Contractors' technicians receive comprehensive training to inspect, test, install, maintain, and repair fire and smoke dampers in strict accordance with National Fire Protection Association (NFPA) codes and standards. Their certified expertise ensures these critical life safety systems function when they're needed most—protecting lives and property in emergencies.

Fire & Life Safety in Hospitals

SMACNA Contractors provide certified testing for all critical life safety systems, including:

- Fire dampers
- Smoke control systems
- Stairwell pressurization

Hiring a Certified Contractor ensures your project is completed by highly skilled and trained technicians who stay current on codes and standards. Choose contractors committed to continuing education and workforce development. Choose SMACNA.
