Return of the Economist: COVID-19 Economic Update

COVID-19 has rocked what had appeared to be a nearly inevitable economy; one associated with substantial job growth, multi-decade lows in unemployment, steady compensation increases, robust retail sales, low inflation, and strong financial market performance.

In this session, you will learn how underrated that strong performance, however, was a set of fragilities that have been exposed by the pandemic. This session will deliver crucial information on the following topics:

- Our current economic circumstances
- Difficulties in the foreseeable future
- Contours of a brisk recovery to come thereafter

Use this pop-up chat box if you need technical assistance.
