

REDEFINE OVERHEAD WORK

Exoskeleton EXO-01

Hilti now offers the Exoskeleton EXO-01 as a pioneering solution to improve jobsite efficiency and alleviate upper-body fatigue and pain resulting from repetitive overhead tasks.

The EXO-01 leverages passive exoskeleton technology (mechanical expanders) that is intuitive, easy-to-adjust, well-balanced, lightweight, and offers a virtually unimpeded range of motion.

Bringing safety and comfort to demanding applications like overhead drywall, piping, air duct, cables and conduit installation among others, the EXO-01 prioritizes safety and productivity.

There has never been greater focus to improve health, safety, and efficiency on the jobsite. Let Hilti's Exoskeleton EXO-01 help you redefine the way you safely and effectively tackle overhead work today.

APPLICATIONS AND ADVANTAGES

Applications

- Installing overhead air ducts and ventilation equipment
- Installing overhead sprinklers
- Installing overhead piping
- Installing overhead cables and conduits
- Hanging drywall board

Advantages

- All-day comfort — weighing under 4.4 lbs, this ultralight exoskeleton can help delay arm/shoulder muscle fatigue during long periods of overhead work
- Freedom of movement — provides dynamic support without restricting the range of motion of arms and torso
- Versatile — engineered to provide support for virtually any overhead installation work on construction jobsites
- No batteries needed — no power source to charge and no motors to maintain help ensure your overhead exoskeletons are ready whenever you need them
