

GPS Vehicle Tracking System

Good for **drivers**. Great for **business**.

Azuga joined SMACNA to provide contractors and organizations with the best in software and GPS vehicle tracking. Harness the power of GPS, vehicle diagnostics, and driver rewards to create a fleet tracking system that not only does the job, but makes everybody’s job easier to do.

Put safety first.

Take advantage of information—such as speeding, hard braking, cell phone distractions, and service warnings—to keep both drivers and vehicles performing at their best.

Keep tabs on your fleet.

Use the live map view to see where your fleet is at all times. Job, driver, speed, location, and weather information is available instantly.

Delight customers.

Contractors can provide an Uber-like customer experience via email and/or text notifications that include a link to the technician’s real-time location and time of arrival to the customer’s location.

Streamline reporting.

Service managers can more accurately track when technicians arrive on a job site and when they leave. This data powers custom reports for payroll, job costing and accounting purposes, eliminating hours of report consolidation each week.

Exclusive Offer for **SMACNA** Members
